*Are you treating injured workers in your practice?*

*Do you feel you could benefit from some training in occupational health?*

*Are you unsure about how to help your patients return to work safely and quickly?*

*Would you like to meet minimum standards in Washington State for providers who treat injured workers?*

***If yes to any of the above—consider this course!***

The University of Washington's Northwest Center for Occupational Health and Safety and the University of Otago New Zealand have joined together to offer an *Online Course on Graduated Return to Work*, designed for physicians, nurse practitioners, physician assistants and occupational health professionals.

## LEARNING OBJECTIVES

- Describe the physical, mental, vocational, and social consequences of being out of work.
- Explain why return to work is essential.
- Develop a framework for planning graduated return to work.
- Coordinate with stakeholders when developing realistic goals and time frames for milestones.
- Use tools for graduated return to work in clinical practice.
- Apply a graduated return to work approach to injury treatment as part of an overall package of injury treatment.
