

INTEGRATED PEST MANAGEMENT FOR MULTI-FAMILY HOUSING

Healthy Homes Training: Protecting children and their families from housing-related health and safety hazards

TRAINING OVERVIEW

This 1-day course is designed to help property managers, resident leaders, pest control operators and pest management professionals work together to implement a comprehensive integrated pest management program by developing the skills and practices needed to effectively eliminate pests such as cockroaches and rodents from multi-family housing.

TRAINING DATES & LOCATIONS

February 9, 2018	Seattle, Washington
February 23, 2018	Portland, Oregon
March 9, 2018	Spokane, Washington

Registration Price: \$85
To register, visit osha.washington.edu/pages/healthy-homes-training

ABOUT HEALTHY HOMES

Environmental hazards in the home harm millions of children each year. In 1999, in response to a Congressional Directive over concerns about child environmental health, the US Department of Housing and Urban Development (HUD) launched its Healthy Homes Initiative (HHI) to protect children and their families from housing-related health and safety hazards. The University of Washington Department of Environmental and Occupational Health Sciences is proud to offer training through the Healthy Homes Training Center. For more about the Healthy Homes Initiative, visit hud.gov.
