Basic Investigation Principles: Digging into the Root Causes

September 26, 2023, 8:00am – 4:00pm Pacific Time

Pre-conference course at the Washington State Governor’s Industrial Safety and Health (GISH) Conference

Thousands of workers are injured on the job each year. Accidents in the workplace are preventable—so why do these incidents still happen? This course explores the principles and methods for digging into the root causes of a workplace incident to prevent future injuries and illnesses. Root cause analysis identifies approaches, techniques, and tools to uncover the systematic causes of an incident. Course participants will leave with a basic understanding of the procedure for incident investigation, using root cause analysis and an introductory understanding of appropriate preventive measures or corrective actions. Health and safety professionals and workers with an interest in safety and accident investigation should attend.

MEET THE INSTRUCTOR

Rocco Meraglia, B.Ad, Dip. OHS, CRSP, ASP, Cashman Global (HSE & Security) Management LLC

Rocco Meraglia has over 35 years of experience in health, safety, and emergency services implementation on major global projects.
