2018  
WEBINAR  
SERIES

# FIRE MARSHAL AND CODE OFFICIAL'S BOOT CAMP

Hazardous Materials Requirements of the  
International Codes Live Webinar Series

JAN 25-DEC 13, 2018

Whether you are a fire professional looking to transition into code enforcement, or an experienced building inspector or safety professional looking for best practices in emerging topics in the 2016 code update, we invite you to enjoy the training benefits of this webinar series.

## COURSE PURPOSE

Fire, building, mechanical, and electrical codes provide minimum life safety requirements. For buildings with hazardous materials, these codes are comprehensive, complicated, and require specific technical training for successful implementation. The purpose of this monthly series of webinars is to help prepare code professionals to review plans and inspect facilities for compliance with the hazardous materials provisions of the fire, building, mechanical, and electrical codes.

## COURSE OBJECTIVES

At the completion of this webinar series participants should be able to:

- Understand hazardous materials requirements of the fire, building, mechanical and electrical codes.
- Improve the quality of construction plan reviews and building inspections related to hazardous materials requirements.
- Review inspection checklists using code citations and other tools to identify code discrepancies.
- Discuss hazardous materials and code requirements associated with special equipment, processes, and other systems.

## INTENDED AUDIENCE

This 10-part webinar series is designed for fire marshals, code officials, health & safety professionals, and engineers and architects working at all levels of experience. Each month features two sessions, Boot Camp and Special Topics. The Boot Camp session is designed for new inspectors, fire marshals, and plan reviewers. Boot Camp will kick off with an International Codes 101 Webinar as an introduction to the field. The Special Topics session dives deeper into specialized and emerging code topics such as compressed gases, chemicals, ammonia refrigeration, explosives, GHS, a Review of a Recent Hazmat Incident and other equipment and processes.

# FIRE MARSHAL AND CODE OFFICIAL'S BOOT CAMP

JAN 25-DEC 13, 2018

Hazardous Materials Requirements of  
the International Codes

## SCHEDULE

Date	Boot Camp	Special Topic
1/25	International Codes 101; Development of the I-Codes	Global Harmonized System of Chemical Classification
2/22	HMIS	Ammonia Refrigeration
3/15	IBC H-Occupancies	NFPA 45 Fire Protection in Laboratories Using Chemicals
4/19	FC Chapter 50 Hazardous Materials— General Provisions	Explosion Control
5/17	Separation & Containment	Compressed Gases and Acetylene
6/21	Exhaust Ventilation	High Pile Storage
9/20	Electrical for a Hazardous Location	LPG, Hydrogen, and Natural Gas Fueling Facilities
10/18	Chemical Tanks & Pipes	Review of Recent Fixed Site HazMat Incident
11/15	Flammable Liquids	Metal Treatment and Platin
12/13	Chem Storage in Group M & Cooking	Explosives and Ammonium Nitrate

## REGISTRATION

Register online at [osha.washington.edu](http://osha.washington.edu) or by calling the DEOHS Continuing Education Programs at **206-543-1069**. **Deadline to register is January 20, 2018.** After January 13, 2018 a \$50 late registration fee will apply. Registration price *per computer* (no restrictions on number of attendees viewing per computer):

Boot Camp (10 sessions)	\$500
Special Topics (10 sessions)	\$500
Boot Camp & Special Topics (20 sessions)	\$800

A webinar participation link and instructions will be provided to all registered parties prior to the first webinar.

## ACCREDITATION

This offering may qualify for International Code Council (ICC) continuing education units (CEUs) to maintain ICC certification. Please contact your local ICC Chapter or visit the ICC website at [www.iccsafe.org](http://www.iccsafe.org) for more information. One hour of training qualifies for 0.1 CEUs. This training may apply to Inspector I and Inspector II certifications. American Board of Industrial Hygiene Certification Maintenance may be obtained for this activity. See the ABIH website for criteria.

## INSTRUCTORS

**Will Winslow** is a Certified Industrial Hygienist and a Certified Fire and Mechanical Code Inspector with 25 years' experience in plan review and code enforcement. Mr. Winslow is a Professional Member of the ICC, and served on the ICC Fire Code Committee and is a past National Codes Director for the Washington State Association of Fire Marshals.

**Richard Williams** is a Certified Plans Examiner with over five years of experience in commercial and residential plan review. Mr. Williams is a member of WABO and the ICC. He is the vice-president of CWA Consultants, a structural engineering plan review and code consulting company in Washington State. In addition, he works closely with Will Winslow on a variety of hazardous material related projects.
